Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is the first Office Action for the serial number 10/711,928, SUPPORT FOR FIXING AN ELECTRONIC MODULE TO AN AUTOMOBILE BATTERY, filed on 10/13/04.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 3, "battery" is indefinite because it cites combination/subcombination problem. "Battery" is not positively cited in the preamble of claim 1.

Claim 2, line 5 and claim 3, line 3, "the electronic module" is indefinite because it cites combination/subcombination problem. "The electronic module" is not positively cited in the preamble of claim 1.

Claim 3 recites the limitation "circuit" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "terminal" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

Art Unit: 3632

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by
US Patent # 6,497,395 to Croker.

Croker teaches a support (1) comprising a U-shaped profile (2) having latter (10) therein and side branches (8) with pins (28). The intermediate branch (22) of the latter has projections (24 and 26) shaping of fork. The projections further include locking claws (4' and 6') which lock behind the bridges (55) provided in the recesses of the module (40).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Croker in view of
US Patent # 5,439,396 to Magdaleno.

Croker teaches the module but fails to teach the module includes a clamp of the circuit corresponding to the module to the terminal. Magdaleno teaches the clamp (42) of the circuit (20) corresponding to the terminal (25). It would have been obvious for one of ordinary skill in

Art Unit: 3632

the art at the time the invention was made to have included clamp of circuit and terminal to Croker's module as taught by Magdaleno to provide communication for cable to the terminal.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent # 5,294,906 to Totsuka et al.

US Patent # 5,533,696 to Laughlin et al.

US Patent # 5,531,414 to Benedetto et al.

US Patent # 6,229,236 to Fisher et al.

Totsuka et al., Laughlin et al. Benedetto et al. and Fisher et al. teach U-shaped bracket.
